TRACS[®]

YOUR CONNECTION TO
THE U.S. CUSTOMS AND BORDER PROTECTION
AUTOMATED MANIFEST SYSTEM

DESIGNED BY
MARITIME PROFESSIONALS
FOR MARITIME PROFESSIONALS

AT THE FOREFRONT OF PORT AUTOMATION SYSTEMS FOR THE MARITIME INDUSTRY SINCE 1984

QUICKLY AND EFFICIENTLY CLEAR CARGO WITH ENHANCED DATA ENTRY AND REPORTING FEATURES

ELECTRONIC MANIFEST FILING

TRACS is the community-based cargo release module to submit ocean import manifest information to U.S. Customs and Border Protection.

-  TRACS streamlines manifest submissions through simple on-line data entry and powerful import functionality - you choose the best input method for your needs
-  With fewer screens and an intuitive, easy to learn interface, you spend less time on data entry and more time serving your customers
-  Manifests and status messages are automatically shared electronically with trading partners to reduce phone calls, emails . . . and more importantly, to speed up cargo delivery

TRACS was developed and is maintained by maritime professionals who understand the business.

- ◆ The Maritime Exchange, a non-profit trade association representing commercial maritime businesses, has been processing electronic manifests for the port industry since 1988
- ◆ The system was developed in cooperation with the port community - people like you who know what they need in a manifest system
- ◆ TRACS remains fully compliant with emerging CBP requirements to help ensure your cargo moves as quickly as possible to its final destination
- ◆ The Maritime Exchange monitors CBP regulations and procedural changes that affect filers, freeing up your time to focus on your business
- ◆ TRACS is supported by a trained and knowledgeable operations staff 24 hours a day, 365 days a year

Your data is protected through a secure network to maintain data confidentiality while at the same time ensuring your trading partners with a right to the information receive it in a timely and cost effective manner.

FAST, EFFICIENT DATA ENTRY AND UPLOAD

- ◆ Fully web-based system provides access to TRACS from virtually anywhere, anytime
- ◆ Copy features reduce rekeying of duplicate data within a manifest
- ◆ Streamlined functions facilitate moving and copying bills of lading to other ports of discharge or other manifests without rekeying
- ◆ Manifest upload feature allows you to import data from your system directly into TRACS to further reduce data entry

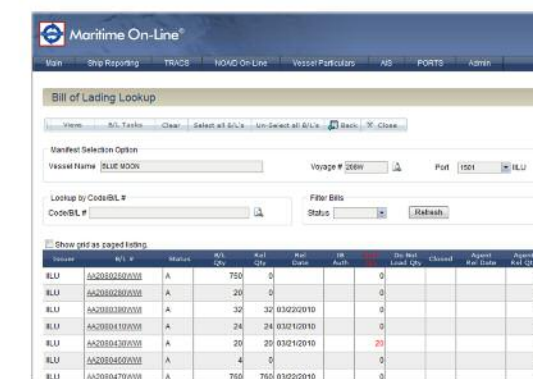

SECURITY FILING & STOW PLAN COMPLIANT (10+2)

- ◆ File required Inbond and FROB data to meet Advanced Security Filing Requirements (ISF-5)
- ◆ Enter or upload Stow Plan information for all containers to meet federal reporting requirements
- ◆ ISF-5 and Stow Plan are integrated with the manifest to reduce redundant data entry

STATUS REVIEW AND REPORTS

- ◆ Searchable online and printable status review at your fingertips
- ◆ Comprehensive reports detail all activity, history, and statuses associated with your bills of lading

 **Print Customs Form 1302 directly from TRACS**

STREAMLINES DATA SHARING WITH TRADING PARTNERS

Information can be shared with your trading partners - online and through automated data transfers - to speed up the cargo clearance and movement process

The Maritime Exchange has been in the business of collecting and disseminating maritime data for over 135 years. We are a maritime trade association intimately familiar with all aspects of the waterborne trade industry - let us put our experience to work for you.
